

Veradel® 3300 PREM

polyethersulfone

Veradel® PESU was formerly marketed as Gafone™ PESU

Veradel® polyethersulfone (PESU) is transparent and offers high heat deflection temperatures, excellent toughness and dimensional stability, and resistance to steam, boiling water, and mineral acids. Other desirable properties include thermal stability, creep resistance, and inherent flame resistance. Veradel® 3300 is FDA compliant and therefore approved for direct food contact.

Veradel® 3200 is a low melt flow grade that can be processed by extrusion or injection molding. Veradel® 3300 is a medium melt flow grade suggested for general purpose injection molding. Veradel® 3400 is a high melt flow grade designed for easy molding of parts with thin walls or long flow lengths.
